

Custom-made electrical distribution boxes in the UAE

Overview

Discover the UAE's leading control panel manufacturers, innovating for quality and reliability in the industrial sector.

Key Takeaways

Customized electrical distribution boxes in the UAE are available from leading manufacturers, offering tailored solutions for industrial, commercial, and residential applications with high safety and durability standards.

Electrical distribution boxes, also known as DB panels or breaker panels, are essential for safely distributing electrical power from a primary source to multiple circuits while protecting against overloads, short circuits, and electrical faults. In the UAE, several manufacturers provide customizable solutions to meet specific project requirements, including load capacity, environmental conditions, and regulatory compliance.

Key Manufacturers and Offerings

- **Kesher Automation:** Offers LT and industrial distribution boxes with CPRI approval, ensuring compliance with international safety and performance standards. Their panels are customizable for different configurations, scalable for future expansion, and designed for durability in industrial and commercial environments. Features include overload protection, short-circuit safeguards, and energy-efficient operation.

- Al Safeenah: Provides distribution boxes made from carbon steel, stainless steel, or thermoplastic, with IP65/IP66 ratings for weatherproofing. Their modular design supports DIN-rail mounting for MCBs, RCDs, and surge protectors, suitable for construction sites, industrial plants, telecommunications, commercial buildings, and renewable energy systems .
- Fiorentina AE: Supplies a range of main, sub, and final distribution boards, including weatherproof options for outdoor installations. They emphasize load capacity, material quality, and IP ratings to ensure safety and longevity .
- BlueDot Trading LLC: Specializes in customized distribution boards with advanced features like surge protection, ground fault protection, and arc fault protection. They provide tailored solutions based on client requirements and offer technical support, maintenance, and repair services .

Customization Features

Customized distribution boxes in the UAE can include:

- Material selection: Metal (steel, stainless steel) or high-grade thermoplastics for corrosion resistance and mechanical strength.
- IP ratings: IP65/IP66 for dust and water protection, suitable for harsh outdoor or industrial environments.
- Modular design: Supports easy installation of MCBs, RCDs, surge protectors, and other components.
- Load management: Configurable to handle specific electrical loads and circuit requirements.
- Safety features: Surge protection, arc fault detection, and ground fault protection.
- Integration: Compatible with renewable energy systems, industrial automation, and commercial infrastructure.

Applications

Customized distribution boxes are widely used in:

- Industrial facilities: Protecting machinery and automated systems.
- Commercial buildings: Managing HVAC, lighting, and office power distribution.
- Construction sites: Temporary ruggedized power distribution.
- Telecommunications: Powering remote base stations and data hubs.
- Renewable energy: Centralizing DC/AC distribution for solar and wind systems .

Conclusion

For projects in the UAE, customized electrical distribution boxes provide flexibility, safety, and durability. Leading manufacturers like Kesher Automation, Al Safeenah, Fiorentina AE, and BlueDot Trading LLC offer tailored solutions that meet international standards, support modular installation, and withstand environmental challenges, making them suitable for a wide range of industrial, commercial, and residential applications.
