

Dual-fiber optical module LC interface

Overview

An SFP duplex LC connector is a fiber optic interface used in many small form-factor pluggable (SFP) optical transceivers to enable full-duplex optical communication. CONQUER DISTANCE: 80km Long-Range Transmission Power Subheading Focus: Transmission Distance & Wavelength Distance limits many networks. Standard modules fail over long runs. It uses two multi-mode optical fibers and the speed rate can up to 10Gbps, transmission distance up to 300m. This product need to use in pair and match up with fiber converter and optical Ethernet switch with SFP slot, it can be used in Ethernet, telecom and. Our new SFP modules with LC duplex connection are compatible with many switches with an SFP interface. It offers digital diagnostics monitoring through a 2-wire serial interface.
