

East Africa Access Optical Cable

Overview

The 2Africa cable, which fully landed in 2024, has materially improved East African international bandwidth pricing. The PEACE Cable provides a second high-capacity Asia-to-Africa route. SEACOM/Tata TGN-Eurasia anchors regional connectivity to global hubs. An extension of the cabling to West Africa set to empower 100 million people across eight African countries. With a focus. This is a list of terrestrial fibre optic cable projects in Africa. While submarine communications cables are used to connect countries and continents to the Internet, terrestrial fibre optic cables are used to extend this connectivity to landlocked countries or to urban centers within a country. Ethio telecom, Djibouti Telecom and Sudatel Group sign an agreement to deploy a cross-border optical fibre corridor linking submarine cables across East Africa. In total, the networks. That's the layer that's been quietly expanding through 2024 and 2025, and it's the layer that determines whether the data center buildout, the digital banking expansion, the e-commerce growth, and the diaspora-targeted fintech all execute on time or get bottlenecked at the throughput layer.
