

Fiber Optic Cable Splicing Communication Cabinet

Overview

Large outdoor cabinets can house fiber optic splitters, patch panels, and splicing trays for network distribution in urban and rural deployments.

Key Takeaways

Large outdoor cabinets can house fiber optic splitters, patch panels, and splicing trays for network distribution in urban and rural deployments. Sealed enclosures designed for underground, aerial, or direct-buried applications, protecting fiber splices from environmental hazards. In residences, the natural choice is a subscriber box, while cable channel and wall outlets are preferred in office environments. Common to all these is that the fiber can be spliced and coiled inside. Multilink's Fiber Distribution Hubs are setting the standard for cross-connect configurations, configurable splitting, plug-and-play technologies and many other fiber architects. Fiber optic distribution box at Real Madrid Sports City (Spain) Lockable aluminum box for fiber optic splicing with 8 SC connectors and guides. Recubrimiento electroestático en polvo 100-150 μ .
