

Fiber Optic Cable for Sale

Overview

Get the best deals on Optical Fiber Cables and find everything you'll need to improve your home office setup at eBay .

Key Takeaways

Fiber optic cable costs range from \$0.09 to \$6 per foot depending on type, strand count, and installation requirements. Material Costs

- Single-mode fiber: Typically \$0.10 to \$0.50 per foot for the cable itself, making it cheaper per foot than multimode fiber but requiring more expensive equipment for operation .
- Multimode fiber: Usually \$0.30 to \$1.00 per foot, with higher strand counts increasing costs proportionally (e.g., a 12-strand cable $\approx$ \$0.50/ft, a 24-strand cable $\approx$ \$1.00/ft), .
- Bulk wholesale purchases: \$0.09 to \$1.52 per foot, while retail prices range from \$1 to \$6 per foot depending on fiber count, jacket type, and application .
- Specialty cables: Armored or direct-burial cables can cost \$0.50 to \$5 per foot, and pre-terminated patch cables are more expensive due to factory termination .

Installation Costs

- Indoor runs: Basic 1,000 ft single-mode installation with minimal termination can cost around \$2,650–\$3,100, including labor, permits, and accessories .
- Outdoor runs: A 2,000 ft outdoor run with conduit and multiple terminations may cost \$4,940–\$6,120, while premium 5,000 ft armored outdoor installations with splicing and professional testing can reach \$11,000–\$14,500 .

- Factors affecting installation: Labor for trenching, splicing, and termination; permits; delivery; and regional variations in labor and material costs .
- Other Considerations
- Cable type: Indoor riser-rated cables are cheaper than plenum-rated cables; outdoor or armored cables are more expensive.
 - Core material: Glass fiber cores offer higher performance but cost more than plastic optical fiber alternatives .
 - Connector type: SC, LC, or APC connectors and simplex vs duplex configurations can influence the final price .
 - Project scope: Larger projects with multiple buildings or high strand counts increase total costs, while short runs or home FTTH setups are relatively inexpensive . In summary, fiber optic cable pricing varies widely based on fiber type, strand count, cable construction, installation complexity, and regional factors, with material costs starting as low as \$0.09 per foot and full installation projects potentially exceeding \$14,000 for long, armored outdoor runs .
