

How to install cable trays after the cable tray pre-embedded box is installed

Overview

This guide covers the critical steps, from selecting the right electrical cable tray and performing accurate cable fill calculations to managing a safe cable pull through and ensuring all bonding and grounding requirements are met. But before you lay the first tray or clamp down a single cable, you need a solid plan. This guide breaks down the process step by step. The process described here takes a systematic approach to ensuring that cable tray installations meet safety, reliability, and project-specific needs while following to. In order to begin the job, trace a straight line where the trays will pass. It casts a clear light beam on the ceiling or wall that will enable an individual to determine whether the course is completely straight before any holes are drilled. The Cable Tray system is installed in electrical rooms, plant rooms, and service corridors.
