

Hungarian 24-port ODF terminal box

Overview

This 1U sliding type rack mount terminal box is a high quality fiber optic patch panel. With 48 core and 24 port design, it offers efficient optical signal transmission. ODF series are standard 19 "rack mount chassis with integrated fiber optic fusion with a unit box, they are easy to install and operate, flexible, and can adjust the position by the mounting ears to meet the front, mid, and ends installation requirements, ideal for ODN deployment. The 24 port fiber optic ODF unit is the convenient cable management for fiber connections, supervising and maintenance. Fiber distribution box is suitable for the wiring connection of optical cable and optical communication equipment, through the adapter in the wiring box, the optical jumper leads the optical signal, and realizes the optical wiring function. It can also work as a protective device. This type of ODF is design for large splice tray, excellent armor plate, and has good protection of pigtails.
