

Integrated Distribution Box Jxf

Overview

JXF low-voltage integrated distribution boxIts reliable structural design and flexible configuration scheme can fully meet the requirements of power distri.

Key Takeaways

The JXF Integrated Distribution Box is a versatile low-voltage power distribution unit designed for AC systems up to 500V, with protection levels up to IP55 and rated currents up to 630A.Key Specifications

- Voltage and Frequency: Suitable for AC 50Hz systems with rated voltage below 500V, commonly 400V for three-phase systems .
- Current Capacity: Maximum rated current ranges from 400A to 630A depending on the model .
- Protection Level: Standard protection is IP40, with options up to IP55 for dust and water resistance .
- Material and Construction: Made from cold-rolled steel with epoxy resin or electrostatic powder coating, providing corrosion resistance and durability .
- Design Features: Knock-out holes on top and bottom, movable mounting plates, and flexible internal layout for easy installation of electrical components. Doors open beyond 110 degrees for convenient access .

Applications

- Industrial and Mining Enterprises: Power distribution, motor control, and metering for machinery and equipment .

- Commercial Buildings: Hotels, shopping malls, and office buildings for centralized power distribution and metering .
- Residential Buildings: Floor distribution, lighting control, and safe power supply for homes .
- Specialized Uses: Motor starting, soft starter or variable frequency drive integration, water pump and fan control, and outdoor lighting management .

Installation and Flexibility

- Mounting Options: Wall-mounted, recessed, or floor-mounted depending on project requirements .
- Internal Layout: Movable mounting plates allow components to be arranged according to circuit diagrams, supporting multi-tube incoming lines .
- Environmental Conditions: Operates reliably up to +40°C with relative humidity up to 50%, and higher humidity allowed at lower temperatures .

Advantages

- Reliable Protection: Guards against overload, short circuit, and leakage .
- Flexible Configuration: Supports various electrical setups and user-specific customization .
- Durable and Aesthetic: Corrosion-resistant materials and powder-coated finish ensure long-term durability and professional appearance .
- Ease of Installation: Knock-out holes, pre-installed opening plates, and humanized design simplify wiring and component installation . The JXF Integrated Distribution Box is a robust and adaptable solution for low-voltage power distribution, suitable for industrial, commercial, and residential applications, offering both protection and installation convenience.
