

Ireland One-Core Drop Fiber Optic Cable

Overview

Single Mode Fiber Optic Indoor Drop Cable, 1 Core, SC UPC/LC UPC. Premium single mode fiber optic cable devised for high-speed data transmission in indoor.

Key Takeaways

One-core drop fiber optic cables are single-fiber cables designed for last-mile connections, suitable for aerial, duct, or direct-buried installations in Ireland.

A one-core drop fiber optic cable is a single-fiber cable used to connect a service provider's distribution network directly to a subscriber's home or business. These cables are essential for fiber-to-the-home (FTTH) or fiber-to-the-premises (FTTP) deployments, providing high-speed data, voice, and video services reliably.

Construction and Features

- **Single Fiber Core:** Contains one optical fiber, typically single-mode (G.652.D or G.657.A1) for long-distance transmission.
- **Buffer Tube:** The fiber is housed in a loose or tight buffer tube for protection.
- **Sheath Options:** Available with Low Smoke Zero Halogen (LSZH) for indoor/outdoor use, or dielectric jackets for outdoor installations.
- **Gel-Filled or Gel-Free:** Gel-filled tubes provide moisture protection, while gel-free (arid core) designs simplify handling and splicing.

- **Strength Members:** Parallel strength members or steel wire/armored options enhance tensile strength and rodent protection for direct-buried or aerial installations .

- **FastAccess Technology:** Some cables, like Corning ROC™ Drop, feature FastAccess technology for up to 55% faster fiber access during installation .

Installation Options

- **Aerial:** Self-supporting or messenger-supported cables can be installed on poles.
- **Duct:** Suitable for underground conduit installations.
- **Direct-Buried:** Armored or steel-reinforced cables provide durability in harsh outdoor environments .

Applications

- **Residential and Business FTTH/FTTP connections.**
- **Rural broadband deployment with long pole-to-pole spans.**
- **Indoor/outdoor hybrid installations** where flexibility and compact design are required .

Suppliers in Ireland

- **Corning:** Offers SST-Drop™ and ROC™ Drop cables with FastAccess technology for single-fiber installations .
- **Eland Cables:** Provides single-mode and multimode fiber cables with LSZH or armored options for indoor and outdoor use .
- **Cable Monkey Ireland:** Supplies Starlight™ Uni Tube and SWA armored single-fiber cables suitable for direct burial and harsh environments .
- **CommScope:** Offers a range of single-fiber drop cables, including gel-free and LSZH dielectric options for FTTH deployments . These cables are widely used in Ireland for high-speed broadband rollout, ensuring reliable connectivity in both urban and rural areas. When selecting a one-core drop cable, consider fiber type, installation environment, and ease of splicing or connectorization to match your network requirements.
