

Netlink Fiber Optic Transceiver Module

Overview

NETLINK SFP fiber optic transceiver working at 850/1310nm wavelength, could use with both multimode optical fiber and single mode optical fiber, it is small size transceiver with LC interface and it is hot swappable, easy to use, no need further configuration. The small form-factor pluggable (SFP) is also called Mini GBIC is a hot-pluggable transceiver used for both telecommunication and data communications applications. It interfaces a network device for a switch, router, media converter or similar device to a fiber optic or copper networking cable. The traditional 10/100M Fast Ethernet can be extended to the distance of 120km through optical fiber link. For telecommunications, broadcasting. netlink HTB-1100 10/100/1000Mbps Multi-Mode Duplex Optic Fiber Transceiver offers 2KM fiber Ethernet media conversion for CCTV FTTH. It can achieve two different twisted-pair cable and optical fiber transmission medium of transformation, relay base - TX 10/100 and 100 base - FX two different network segments, can satisfy the long distance, high speed and high.
