

Papua New Guinea Fiber Optic Cable Splicing

Overview

Lead Short, real-world clips labeled PNG KWAP videos show an EarthLink fiber optic splicer performing cable splices.

Key Takeaways

Cetelnet, Voltran Engineering, and East Coast NetLink are leading fiber optic contractors in Papua New Guinea, offering splicing, installation, and network services. Key Fiber Optic Service Providers

Cetelnet is a full-service fiber optic contractor in PNG, providing network design, installation, fusion splicing, testing, and maintenance for urban and remote areas. Their technicians are certified to international standards, ensuring high-quality, low-loss fiber connections. Cetelnet serves telecommunications providers, government agencies, healthcare, education, and industrial sectors, offering both underground and aerial fiber deployment adapted to PNG's diverse terrain. Voltran Engineering specializes in optical fiber splicing and testing, alongside OPGW and ADSS fiber cable design. They provide engineering, construction, and installation services for power and communication networks, including underground cabling and stringing of fiber optic cables. Their expertise ensures robust and reliable network infrastructure for both high voltage and low voltage systems. East Coast NetLink delivers fiber optics connectivity solutions for businesses and organizations, offering high-speed, secure internet access, data transmission, and cloud services. They provide customized solutions for multiple locations, remote areas, and corporate clients, complementing fiber networks with satellite communications for backup and emergency operations.

Submarine Fiber Optic Infrastructure

The Coral Sea Cable Company operates the 4700 km Coral Sea Cable System, connecting Port Moresby in PNG to Sydney, Australia, and Honiara, Solomon Islands. This submarine fiber optic system supports high-capacity, reliable international connectivity and is built using Dense Wavelength Division Multiplexing (DWDM) technology. While primarily a backbone provider, it underpins terrestrial fiber networks and enables high-speed internet access across PNG .

Summary

For fiber optic cable splicing and network services in Papua New Guinea, Cetelnet and Voltran Engineering are the primary contractors for terrestrial projects, offering certified splicing, installation, and maintenance. East Coast NetLink provides business-focused connectivity solutions, while the Coral Sea Cable Company ensures international backbone connectivity. These companies collectively support PNG's growing demand for high-speed, reliable fiber optic networks across urban, rural, and remote regions .
