

Singapore-based professional manufacturer of spectrometers

Overview

Spectrometer Manufacturers The leading Spectrometer Manufacturers in Singapore are listed in this directory. You can narrow down the list of manufacturers.

Key Takeaways

Singapore hosts several professional spectrometer manufacturers and suppliers, including Attonics Systems, Inscope Labs, Research Instruments Pte Ltd, and distributors like Analytik Jena and Spectro Scientific. **Key Manufacturers and Suppliers**

Attonics Systems specializes in high-end, portable spectrometer solutions with research-level performance, offering miniaturized devices suitable for real-time sensing and gas detection applications. Their spectrometers are noted for compact form factor, high resolution, and cost-effectiveness, making them ideal for field and laboratory use . Inscope Labs Pte Ltd provides analytical and electron device failure analysis services and supports spectrometer applications in electron microscopy, surface analysis, and material characterization. They combine manufacturing and service expertise to meet specialized research needs . Research Instruments Pte Ltd, founded in 1989, distributes and supports current and next-generation spectrometer technologies in Southeast Asia, representing leading global manufacturers and providing technical support for scientific instrumentation . Analytik Jena offers high-end analytical measuring instruments, including spectrometers for biotechnology, molecular diagnostics, and laboratory automation. Their products are widely used in research and industrial applications requiring precision and reliability . Spectro Scientific develops a broad range of fluid analysis instruments, including portable and lab-based spectrometers for evaluating machine and lubricant conditions, suitable for industrial monitoring and quality control .

Additional Resources

For a more comprehensive list of Singapore-based spectrometer manufacturers, directories such as GoPhotonics and Kompas Business Directory provide searchable listings with company profiles, product catalogs, and contact information . These companies collectively cover a wide spectrum of spectrometer applications, from portable field devices to high-precision laboratory instruments, catering to industries such as biotechnology, materials science, environmental monitoring, and industrial process control.
