Key Takeaways

Pricing for Swedish lighting distribution boxes varies by model, outlet configuration, and supplier, with detailed price lists available from Ahlsell, flex7, and Aloud.

Suppliers and Product Options

Ahlsell offers a wide range of distribution boxes suitable for both commercial and residential projects. Their products include wall-mounted and floor-standing units, pre-assembled junction boxes, and construction panels with multiple outlets. Features often include impact-resistant housings, integrated service hatches, twist locks, padlock systems, and compliance with Nordic climate standards and IEC/SS-EN regulations . Pricing is model-specific and can be obtained directly from Ahlsell's online store or local branches.

flex7 provides lighting distribution boxes with robust anodised aluminium bodies and patented internal contact systems. Their boxes are available with 2, 4, 6, 8, 10, or 12 outlets, and expansion boxes allow additional capacity. Each unit comes with mounting clips, screws, and brackets for easy installation. Pricing depends on the number of outlets and optional expansion units, and detailed price lists can be requested from flex7 or their Swedish distributors

Aloud offers a downloadable PDF price list for 2024, which includes backplates and other components relevant to lighting distribution systems. This document can be accessed online and provides a reference for current pricing, though contacting the supplier directly is recommended for the most up-to-date figures .

How to Obtain Prices

- Visit supplier websites: Ahlsell (ahlsell.se) and flex7 (flex7.co.uk) provide product catalogs and contact forms for pricing inquiries.
- Download official price lists: Aloud's PDF price list is available online for reference.
- Contact local distributors: For bulk orders or specific configurations, reaching out to local Swedish distributors ensures accurate pricing and availability.

By consulting these sources, you can compare models, features, and prices to select the most suitable lighting distribution box for your project.
