

What wireless router is needed for a 100m fiber optic connection

Overview

Based on my detailed research, the NETGEAR Nighthawk Tri-Band WiFi 7 Router (RS700S) is the best overall fiber internet router.

Key Takeaways

For fiber optic internet speeds of 100 Mbps or higher, a router supporting at least 1 Gbps is required. Look for routers with AX or AC designations (Wi-Fi 5 or 6) that support faster speeds than older N standards (Wi-Fi 4). Many major ISPs, such as Verizon and Xfinity, offer fiber connections directly to your door, known as FttP or Fiber. Instead of using your old router, a high-performance Wi-Fi router designed for fiber optic internet will ensure you seamless streaming, online gaming, and remote work all over your space. With the many options available on the market, picking the best router for fiber internet can be tricky. The NETGEAR Nighthawk WiFi 7 Router BE9300 Tri-Band blew me away with its blazing speeds up to 9.3 Gbps and coverage of up to 2,500 sq.
